input

click

7

If the welcome Message is displayed, sign-on is complete.

IV. Troubleshooting

Q1

When I connect to the network in II, I get a security message such as "Your connection isn't private" or "Unable to verify the website", and the "Guest Portal" screen in III does not appear.

A1

A security certificate warning may appear. Take the following action for each OS.

OS	Warning screen and countermeasures	
Windows11 Windows10		
macOS		
iOS		

Q2

I closed the guest registration screen before completing guest registration.

A2

If you close the guest registration screen before completing the guest registration in III after completing the network connection in II, you can open the screen again by following the steps below.

OS	What to do	
Windows11	Click the [Network] icon on the taskbar and click the ">" of the Wi-Fi connection. Select the target Wi-Fi network and click "Open browser and connect" to open the guest registration screen.	
Windows10	Click the [Network] icon on the taskbar and click the ">" of the Wi-Fi connection. Select the target Wi-Fi network, click "Disconnect", and click "Connect" again to open the guest registration screen.	
macOS	Restart your Mac and try the steps again.	
iOS Android	From the home screen, tap Settings > Wi-Fi. If you reselect the Wi-Fi network on the Wi-Fi settings screen, the guest registration screen will be displayed again.
